Full Year Highlights

- As of December 31, 2023, the Company served approximately 5.0 million members.
- Premium revenue was approximately \$32.5 billion for the full year 2023, an increase of 5% year over year.
- GAAP net income was \$18.77 per diluted share for the full year 2023, an increase of 39% year over year.
- Adjusted net income was \$20.88 per diluted share for the full year 2023, an increase of 17% year over year.
- The Company issued its full year 2024 earnings guidance with expected premium revenue of approximately \$38 billion and adjusted earnings of at least \$23.50 per diluted share.

"We are very pleased with our fourth quarter and full year results," said Joseph Zubretsky, President and Chief Executive Officer. "Our 2023 performance reflects the successful execution of our growth strategy which positions us to achieve sustainable and profitable growth in 2024 and beyond."

Premium Revenue

Premium revenue was approximately \$32.5 billion for the full year 2023, an increase of 5% year over year. The higher premium revenue reflects the impact of acquisitions and new RFP wins, partially offset by Medicaid redeterminations.

Net Income

GAAP net income for the full year 2023 was \$18.77 per diluted share, an increase of 39% year over year. Adjusted net income for the full year 2023 was \$20.88 per diluted share, an increase of 17% year over year.

Medical Care Ratio (MCR)

- The consolidated MCR for the full year 2023 was 88.1%, consistent with expectation and in line with the Company's long-term target range.
- The Medicaid MCR for the full year 2023 was 88.7%, in line with the Company's expectation and long-term target range. The full year MCR includes the moderate impact from the net effect of redetermination acuity shifts and risk corridors, as well as the impact of new store additions which typically run above portfolio average in the first year.
- The Medicare MCR for the full year 2023 was 90.7%, above the Company's long-term target range, reflecting higher

utilization of supplemental benefits, in-home services, and high-cost drugs throughout the year.

- The Marketplace MCR for the full year 2023 was 75.3%, below the Company's long-term target range, reflecting the success of the Company's product and pricing strategy to return the business to target margins.

General and Administrative Expense Ratio

The G&A ratio and the adjusted G&A ratio for the full year 2023 were both 7.2%, reflecting continued cost discipline and new business implementation spending throughout the year relating to new contract wins.

Balance Sheet

Cash and investments at the parent company were \$742 million as of December 31, 2023 compared to \$375 million as of December 31, 2022.

Days in claims payable at December 31, 2023 was 50.

Cash Flow

Operating cash flow for the year ended December 31, 2023 was \$1,662 million, compared to \$773 million for the year ended December 31, 2022. The increase in 2023 cash flow was due to the growth in operations and net earnings from organic and new RFP starts and acquisitions, accompanied by the net impact of timing differences in government receivables and payables.

2024 Guidance

Premium revenue for the full year is expected to be approximately \$38 billion, an increase of approximately 17% from the full year 2023.

The Company expects its full year adjusted earnings per share in 2024 to be at least \$23.50 per share, representing approximately 13% growth over the full year 2023.

Guidance reflects the continued realization of embedded earnings and underlying organic growth. Guidance metrics are summarized below:

MOLINA HEALTHCARE, INC.
CHANGE IN MEDICAL CLAIMS AND BENEFITS PAYABLE
(Dollars in millions)

The Company's claims liabilities include additional reserves to account for moderately adverse conditions based on historical experience and other factors including, but not limited to, variations in claims payment patterns, changes in utilization and cost trends, known outbreaks of disease, and large claims. The Company's reserving methodology is consistently applied across all periods presented. The amounts displayed for "Components of medical care costs related to: Prior year" represent the amounts by which the original estimates of claims and benefits payable at the beginning of the year were more than the actual liabilities based on information (principally the payment of claims) developed since those liabilities were first reported. The following table presents the components of the change in medical claims and benefits payable for the periods indicated:

	Year Ended December 31,

(1) The Company calculates Days in Claims Payable using claims incurred but not paid, or IBNP, and other fee-for-service payables included in medical claims and benefits payable, and quarterly fee-for-service related costs included in medical care costs within the Company's consolidated financial statements.

MOLINA HEALTHCARE, INC.
RECONCILIATION OF UNAUDITED NON-GAAP FINANCIAL MEASURES
(In millions, except per diluted share amounts)

The Company believes that certain non-GAAP (generally accepted accounting principles) financial measures are useful supplemental measures to investors in comparing the Company's performance to the performance of other public companies in the health care industry. The non-GAAP financial measures are also used internally to enable management to assess the Company's performance consistently over time. These non-GAAP financial measures, presented below, should be considered as supplements to, and not as substitutes for or superior to, GAAP measures.

Adjustments represent additions and deductions to GAAP net income as indicated in the table below, which include the non-cash impact of amortization of acquired intangible assets, acquisition-related expenses, and the impact of certain expenses and other items that management believes are not indicative of longer-term business trends and operations.

Adjusted G&A Ratio represents the GAAP G&A ratio, recognizing adjustments.

Adjusted net income represents GAAP net income recognizing the adjustments, net of tax. The Company believes that adjusted net income is helpful to investors in assessing the Company's financial performance.

Adjusted net income per diluted share represents adjusted net income divided by weighted average common shares outstanding on a fully diluted basis.

Adjusted after-tax margin represents adjusted net income, divided by total revenue.
